Q2 Water Energy System

We have been using the Q2 Water Energy System in our clinic for more than three months as an integral part of our overall treatment protocols, which are based on an EAV device called the BEST Professional.

Many of our clients come to us with symptoms caused by food intolerances and vitamin and mineral deficiencies, which are frequently treated by exclusion diets and supplementation. We find the Q2 to be extremely effective in giving the resultant detoxification process a vigorous kick-start, which speeds the client on the road to recovery. Pre and post Q2 treatment tests with the BEST Professional have shown toxicity level reductions of more than 25% after only half an hour's treatment with the Q2.

We also use the Q2 as an adjunct to Lymphatic Drainage Massage, which often leaves the patient tired, listless and in a state of low energy. The Q2 is particularly effective in revitalising such patients. ME patients also find the Q2 helpful for the same reasons.

The beauty of the Q2 is its ease of operation and the fact that once the treatment commences it requires no intervention from the operator who can continue with other duties or treatments at the same time. This also makes the Q2 a very sound financial proposition.
